

Before you feel great about your “no cavities” check up, ask yourself:

# Is Your Dentist Using a Cavity-Finding Tool That’s **WRONG 76% of the Time?**

*Research shows that’s how often the traditional “pick” examination misses the most common kind of cavities*

The dentist says you’re cavity free and you feel pretty darned pleased about it. All that brushing and flossing and watching what you eat paid off and this is your reward. Right?

Don’t be so sure. Because if what you had was an old fashioned “pick” and x-ray exam, ***those tiny, hidden cavities your dentist just missed could be growing into a painful and expensive problems.***

It doesn’t have to be that way. Today there are super accurate, FDA-approved laser scanners that can find the most COMMONLY MISSED cavities – even tiny ones -- while they’re quick, painless and inexpensive to repair.

## **No More Cavity Hide and Seek**

So how could so many dentists be so wrong so often? Until recently, we just didn’t have the tools to get it right.

You see, cavities often begin deep in the pits and grooves of your teeth – places the best picks just can’t get to. Even x-rays miss these small cavities – They’re simply in a location that x-rays just can’t “see.”

So those tiny cavities grow and grow until they’re large enough to be detected, which means they’re also large enough to need potentially uncomfortable, time-consuming and hard-on-the-wallet dental visits to fix.

## **100% Accurate Exams (Painless, Too!)**

Fortunately those dark ages of dentistry are over, thanks to a device the FDA has certified **100% accurate at finding even the smallest cavities.** A type of compact diode laser scanner, this

exciting new diagnostic device shines a laser beam onto your teeth -- right into those pits and fissures and grooves where traditional picks just can’t go.

That laser light is then reflected out, measured by special receptors and compared to the light reflected by

*Ever wonder how you can  
have no cavities on one  
visit and two big ones on  
the next?*

*There’s a reason – and a  
way to **MAKE SURE IT  
NEVER HAPPENS AGAIN!***

healthy teeth.

The scanner uses this information to give the dentist a precise digital read-out that shows where cavities are – plus it produces a tone that varies depending on their size. In other words, it makes it just about impossible for a dentist to miss even the smallest cavity.

## **Avoid the Drill**

So what does all mean for you? Simply this – ***thanks to our laser scanner, we can now find cavities so early we can usually take care of them quickly and painlessly with new comfortable alternatives to the conventional traditional drill.***

In fact, since I started using my laser cavity scanner I find I’m using my drill a whole lot less and I’m using a TON less

anesthesia because my patients just don’t need it.

## **Peace of Mind at a Special Price**

Frankly, drilling teeth – or, worse, doing root canals – is my least favorite part of being a dentist. I’d much rather keep my patients’ mouths healthy by catching cavities early while they’re easy, painless and inexpensive to fix.

So I’d like to make you this one-time, very special offer:

- Call for an appointment within 10 days and I’ll take **\$80 off the cost of your examination, records and laser scan.**
- Plus I’ll offer you and one relative or friend a **“Two-for-one Professional Home Teeth Whitening System.”** That’s right, normally \$397.00, call within 10 days and you’ll get two whitening’s for the price of one!

Now doesn’t that sound better than wondering whether a small, undetected cavity is getting ready to cause you real problems?

Don’t wait until today’s silent undetected problems become tomorrow’s painful expensive dental emergency! **Call today:**

Joseph M. Miranda, D.D.S  
**Call for an appointment within 10 days for \$80 off the cost of your examination, records and laser scan.**

**In the beginning I felt embarrassed, knowing that my problems were my fault but trying to fix it with little expense. My experiences were horrible! This time I came to talk to Dr. Miranda who has to be one of the kindest dentists I have met. He made me feel comfortable from the beginning, promising not to do anything I was uncomfortable with. I can't believe the results I have received with very little discomfort.**

**I am so happy! It was worth the time and every penny!**

**Thanks so much,  
Mandie Floyd  
Denton, TX**

*Dear Dr. Miranda,*

*I want to thank you and your staff for making my implant procedure such wonderful experience. I am so very pleased with the results, not only esthetically but mentally as well. In summation, you and your practice exemplify the words PROFESSIONAL and CARING. Anything that was remotely uncomfortable during this process was remedied by your quick witt! Thank you for all that you have done for me, there are no words to tell you how much I appreciate it.*

*Beth Lovelady-Knight*

Hey Doc,

I appreciate your kind thoughts and all the care and attention you have paid to me! Thanks for making me feel so special and proving your not just a "dentist". (cause you know how fond I am of THEM) You have truly proven, you and your team are like no other! I will continue to scream from the mountain tops how much I admire your talents and how wonderful your staff is!!! Thanks for all you do!!!

Thanks again,

Jimmy Croteau, Dallas TX

P.S. I hope you and your staff were fortunate enough to have Santa bring everything you asked for... I got mine early, around October!!!! Thanks for the smile, I have the pictures to prove it!!!! GOD BLESS!!!

*Dr. Miranda, Thank you for helping me overcome my fear of the dentist. As you know, I had 6-8 teeth filled with those unattractive silver fillings. Several of the fillings were "deep", but all of them were deteriorating and needed to be replaced. I was full of anxiety! The sedation pill you discussed with me was literally A MIRACLE! I used this pill twice to remove and replace all of those unsightly silver fillings. I felt absolutely NOTHING. I no longer have anxiety over that root canal I am one day bound to have. It's all because of that miracle pill! Thank you all for your patience and coaxing over this pill. I now have a mouth full of beautiful, white teeth! I call it my 'bling' smile!*

*- Shari Gustafson, Dallas, TX*
